

Wintergreen Fire and Rescue Standard Administrative Policy	
Subject:	Structure Calls
Reference Number:	FIRE 02-008
Effective Date:	25-Jan-05
Last Revision Date:	1-Mar-19
Signature of Approval	Curtis Sheets, Chief

Purpose:

The purpose of this SOG is to create a uniform procedure on responding to structure related calls.

Policy:

“Structure related calls” include but are not limited to alarms, smoke or smell of smoke in a structure, chimney fire, or any confirmed fire in a structure.

Station 1:

Refer to response matrix

Station 2:

Refer to response matrix

One operator should stand by with the first in apparatus in case a condition warrants rapid advancement of hose lines.

Personnel entering the structure will have full turnout gear and SCBA on until the situation is deemed safe.

Under fire or immediate danger to life or health (IDLH) atmosphere conditions, the Two In/Two Out rule will be utilized per SOG 02-004. Two firefighters will be at the point of entry with a charged hose line and RIT pack backing up the interior attack team.
